Zalman GPU Cooler VF900-Cu, Pure Copper, w/ Eight RAM Heatsinks.

Zalman GPU Cooler VF900 Cu, Pure Copper, Pure copper heatsink base and fins maximize cooling performance. Fan installed in the heatsink cools not only the VGA chipset and VGA RAM, but all other VGA components.

Features:

- Pure copper heatsink base and fins maximize cooling performance.
- Use of two high performance heatpipes maximizes heat transfer.
- Circular heatsink formed by radially aligned ultra-thin(0.2mm) fins minimizes airflow resistance and maximizes heat dissipation surface area for excellent cooling performance.
- Fan installed in the heatsink cools not only the VGA chipset and VGA RAM, but all other VGA components.
- Does not exert any excessive force on the VGA card due to the product's light weight.
- Improvement in the installation structure provides excellent compatibility and easy installation.
- Adjustable fan speed controller(FAN MATE 2) enables control of noise and fan speed.
- Does not generate noise or vibration in Silent Mode.
