SP# 708610-601 W8 Pro PRODUCT OF CHINA Rev 0W

For the Z820 if you want a v2 motherboard the right side number should be 618266-003 or -004. The left side numbers have to do with the "branding" status in its firmware... No DPK is for Linux builds, and the W8 Pro is for Windows builds. Both can be upgraded to W10.
